

Outline

SUMALEX® is the compact, lightweight, high-performance plate fin heat exchanger. Production using our original brazing technology and argon arc welding provides sound mechanical reliability and airtightness.

SUMALEX® is internationally verified by following quality certifications:

- ISO9001
- ASME certification mark with U
- Korean MA (Manufacture Approval)

TECHNICAL FEATURES

Compact in size and reduce installation space. SUMALEX® can make multiple fluids (up to more than 15) application in one unit.

SUMALEX® is used for variety of industrial process.

- Air Separation Plant
- Hydrocarbon Recovery System
- Natural Gas Process Plant
- Natural Gas Liquefaction Plant
- Ethane and Propane Extraction Systems
- Helium Liquefaction Plant
- Cold Heat Recovery

SPP have provided more than 10,000 sets of plate-fin heat exchangers.
